## Technical Specification Data Provided by [TheMotorOilEvaluator.com](http://TheMotorOilEvaluator.com)

---

Thank you for your purchase of "**No More Oil Changes: The Motor Oil Bible**". As a special bonus for your purchase, you've been given access to this technical specification comparison document. You also have the right to redistribute this document (details in the "Redistribution" section of this intro).

As the author of "**No More Oil Changes**", I am also the designer and owner of the **TheMotorOilEvaluator.com** website which offers a completely free online, searchable, filterable database of nearly 700 different oils.

This document represents a printout of all of the available technical specifications from that online database as of August 25<sup>th</sup>, 2009. There may have been updates to the online database since then, which you may wish to take advantage of. In addition, this is a static list, whereas the online database is always changing and can be filtered, sorted and searched according to your specific criteria.

### **Redistribution of This Document**

You have the right to redistribute this document, but **ONLY** if the document is left entirely intact with no modifications whatsoever, and **ONLY** if it is provided free of charge. You may **NOT** charge any fee for distribution of the document.

If you know of others who would find this information useful, please offer them this document or refer them to [TheMotorOilEvaluator.com](http://TheMotorOilEvaluator.com) for the online version. You might also want to let them know about the "No More Oil Changes" ebook so that they will better understand what

the specs mean and how to compare and understand them.

## **Become an Affiliate or SuperLink Affiliate (55% commission)**

The commission percentage for sales of “No More Oil Changes: The Motor Oil Bible” has just been increased from 25% to 55%, so there is significant money to be made as an affiliate.

If you happen to have a lot of friends, acquaintances, business associates, website visitors, members or subscribers that might have an interest in “No More Oil Changes”, you would be well served to become an affiliate for the book. Becoming an affiliate costs nothing and offers you a 55% payout on all ebook sales.

To become an affiliate, simply setup a ClickBank account (which is free) at [ClickBank.com](http://www.clickbank.com) and then create an affiliate “hoplink” by entering your ClickBank “nickname” in the form found at the link below:

<http://www.clickbank.com/info/jmap.htm?vendor=VACATION1>

Alternatively, you might want to consider becoming a SuperLink affiliate which offers considerably more flexibility and further resources to promote both “No More Oil Changes” and “The Motor Oil Evaluator”.

### ***About the Specs in This Document***

A few notes to keep in mind as you look over the technical specifications in the charts below.

1) Specifications shown in red indicate that the manufacturer of the oil did not provide the data for that specification. Thus, in order to still be able to calculate ranking scores for all oils, TheMotorOilEvaluator.com has inserted default values for these specifications. For the most part, these default values are taken directly from the max/min allowable values based upon

the viscosity of the oil or the API classifications claimed to be met.

For instance, in order to be classified as an SAE 5w30 motor oil, an oil must have a minimum HT/HS (High Temperature/High Shear) score of 2.9. Thus, if an oil's manufacturer indicates that an oil has a 5w30 viscosity but does not list an HT/HS score, TheMotorOilEvaluator website inserts this default minimum value of 2.9. The oil MAY have a higher HT/HS value than that, but, since the manufacturer does not provide the data, it is assumed the value is near 2.9 (otherwise, why not publish it).

2) Scoring and Ranking values are based off of the scoring algorithm established by TheMotorOilEvaluator. If you disagree with the scoring values or believe them to be biased in any way, you are absolutely welcome to ignore them and focus solely on the specifications themselves (on TheMotorOilEvaluator.com website, you can sort and filter your results by the ranking scores as well).

Hopefully, the information provided in this document will help you form an objective opinion of the quality of various oils on the market. Of course, only multiple oil analyses over time will TRULY establish the overall “real world” quality of an oil (some specs can be “doctored” a bit with heavy treatment of low quality additives that quickly break down – leaving a much lower quality oil than you started with).

So, I recommend oil analysis as the ultimate judge of oil quality in your vehicle, but this document is at least a start.

3) Accuracy of data and scoring/ranking values is only as good as the database it was taken from at TheMotorOilEvaluator.com website. None of the data has been modified in any way from that which is available on TheMotorOilEvaluator.com website as of August 25th, 2009.

Updates may have occurred to the original data since this document was created. Always see TheMotorOilEvaluator.com for the most up to date and complete data. In addition, any corrections that should be applied to the database should be indicated through the contact form on TheMotorOilEvaluator.com website.
