

ww-VMW-MB

Valve Assembly Tool For Mercedes Benz

ISO9001 : 2008 | Made in Eichstätt / Germany

Customized for Mercedes Benz
Safe disassembly and assembly
High-precision operation
Enormously time-saving

The valve repair tool ww-VMW-MB (111 589 25 61 00) has been developed especially for Mercedes Benz passenger vehicle engines and cylinder heads. Operation can be done on assembled or disassembled cylinder heads. Valve wedges can be inserted into the valve groove safely and accurately. Usable for engines without bucket tappet (104, 111, 119, 120, 601, 602, 603) and engines which require disassembly of the camshaft housing in order to assemble the valve springs (604, 605, 606).
